

## Hardeners/Activators & Additives

Matrix System premium hardeners are specifically designed to provide exceptional flow and leveling, in addition to a high gloss, durable finish. Our wide range of activators provides you with the flexibility you need to react to changing shops conditions & job requirements from overalls to spot & panel work.

Our premium activators are specifically designed to increase durability and holdout and provide you with the perfect foundation for topcoat.

### ***MX-01 Universal Fisheye Eliminator***

MX-01 was formulated to help overcome "fisheye" problems.

### ***MX-081 Universal Urethane Accelerator***

MX-081 was designed to reduce the cure rate of urethane paints, primers, and clearcoats in cold weather conditions. When properly used, MX-081 will dramatically shorten sanding, buffing, and delivery times.

### ***MX-084 Universal Urethane Enhanced Accelerator***

MX-084 was formulated to reduce the cure, dust & tack time of Matrix System clearcoats. MX-084 can increase shop productivity and profitability when used properly.

### ***MX-841 Flex Additive***

MX-841 was formulated as a universal elastomeric additive for use in two-component coatings where flexibility is desired. When used as recommended, MX-841 will create a refinish coating that will withstand the abuse of minor impacts and flexing during and after installation of a flexible part.
