MANAGEMENT BULLETIN

EPA NESHAP Rule Subpart HHHHHH Painter Training & Certification

NESHAP 6H Painter Training and Certification Regulations are specific. They are distinct from other training certificates provided by jobbers, paint companies, equipment vendors, etc. These requirements also differ from EnviroSafe's 60-Minute Annual SP2 (Pollution and Prevention) Training Certification. EnviroSafe's NESHAP Training Certification materials and documentation meet every requirement--in the most efficient, cost-effective way possible.

NESHAP Painter Training content must include:

- Spray gun selection, set-up, and operation
- Techniques to improve transfer efficiency and minimize overspray
- Routine spray booth and filter maintenance
- Filter selection and installation
- Proper spray gun cleaning
- Compliance with ALL NESHAP regulations

EnviroSafe's NESHAP Training Certification also meets the **REQUIRED HANDS-ON TRAINING**. **The owner /operator of the facility** (not your paint company, jobber, equipment or other vendor) must **certify** that paint department individuals can actually demonstrate the following:

- Successful completion of training
- HVLP or equivalent gun usage
- Proper mixing of materials
- Spray gun set-up, usage, and cleaning consistent
- Spraying only in booth and / or approved prep station
- Proper spray technique
- Booth maintenance procedures implemented and documented

EnviroSafe's NESHAP Training Certification allows painters to demonstrate these procedures as part of the onsite certification process completed by the owner/operator. Find more details at www.gmgenvirosafe.com/eparule.php

If you have any questions, please call our office at 800-619-9733.
