

# Designer Street Rides started with Matrix and wouldn't change a thing!

## Javier Colon Realizes His Dream—Grows His New Custom Shop

Javier Colon has been painting ever since he was a teenager, painting and designing bikes, then moving on to customizing his very first car by painting small parts. While working as a painter three years ago, he was introduced to Matrix products. Soon afterwards, he realized his vision and opened Designer Street Rides, Inc. a custom classic and exotic/sport vehicle customization and restoration shop.

## Matrix Quality and Performance are Second to None

"Since using Matrix, I've never had a problem with color match or performance. As far as quality and cost are concerned, it can't get any better for me and my shop."

## The Matrix Advantage

After learning about Matrix's Intermix Paint System and the ability to mix FX™ Custom Colors, it didn't take much to convince Javier to "Put it to the Test." Using the FX Series™ line of paint, he experienced more vibrant colors, which made his custom work really stand out. "I love the fact that Matrix offers a variety of colors with beautiful color match. We also can mix as little as two ounces of paint and save 90% of the cost by buying a quart of factory packaged paint.

I am honored to say that my customers always leave with a finished product that they are excited and proud of. It's what makes my job so enjoyable and worth all the hard work."

## Another Satisfied Customer Joins the Thousands of Others Nationwide.

Designer Street Rides, Inc. is one of thousands of body shops that have proven Matrix to be a resounding success. According to Javier, "Quality, from the primers to the clears, is what makes Matrix stand above the competition. The considerable savings are also a huge benefit to the Matrix line of products."

"Put it to the Test" today and see for yourself the awesome color match, performance, and savings that others are talking about. Call today to locate a jobber near you.
