8. TECH NOTES
   • Matrix does not recommend nor warranty the blending of clear coats. Over reduction or solvent blending of the clear coat will become visible over time due to UV exposure on the blended edge. The edge may also fade or peel over time due to the minimal film thickness of the blended edge.
   • Matrix recommends applying clear coat to the entire panel. Many of today’s late model cars do not have a distinct edge or a break line on the quarter panel, in these cases Matrix recommends applying the clear coat to the roof and the opposite quarter panel.
   • This procedure will assure a professional repair, that returns the vehicle back to pre accident condition

9. SUBSTRATES
   • All Matrix Refinish Basecoats
   • Existing OEM Finishes

10. APPLICATION
    • Apply two (2) medium wet coats with 2-3 minutes flash between coats.
    *See Notes for additional information
